

Technology partner  
& official sponsor of our conference

# INVITATION

**Come and join PROGIS for the new IT advantage**

(22<sup>nd</sup> - 24<sup>th</sup> of September 2004)

**PROGIS will organize its International Conference 2004 this year again in Austria / Carinthia, at the lovely "[Woerthersee](#)" and would like to invite you cordially to take part. See new technologies - get new ideas - talk with other participants - take home benefits for you!**

Many new IT-challenges will result from the joining of 10 new countries to the European Community and from new EU-legal regulations. Winners will be those who adopt approved concepts and who will be visionary enough to enable further developments which will increase automatically their own profits.

With this conference, PROGIS wants to bring together relevant organizations, partners and customers in order to give answers to important questions linked to legal requirements, to show solutions and to share experiences of users coming from many European countries.

After our conferences last year, with a total of 150 participants coming from 15 countries we could convince many of our partners being on the right way and could also find some new, very innovative thinking partners who are bringing IT and specifically PROGIS based products to the entire rural area of their countries. Farmers, foresters, mayors, utility managers, cooperatives in forestry and agriculture as well as public organizations are meanwhile heavily using PROGIS products or components of our product line.

Are you interested in finding out answers, see practical samples and learn for your benefits? If yes, please join the upcoming PROGIS conference "**IT in Rural Areas**"! We are looking forward to welcome you!
